  - Highways
  - Secondary Roads

Notes: Aerial imagery from National Agriculture Imagery Program (2005). Composite plume footprint from Freon 11, Freon 113, trichloroethylene (TCE) and tetrachloroethylene (PCE) groundwater plume interpretations (CH2M Hill, Draft Remedial Investigation (RI) Report, dated 3/2009). Composite Freon plume footprint from Freon 11 and Freon 113 groundwater plume interpretations (CH2M Hill, Draft RI Report, dated 3/2009). Norwalk, Santa Fe Springs, and Whittier city boundaries from Los Angeles County Department of Public Works (<http://dppgis.co.la.ca.us/webste/oiat/index.cfm>, downloaded on 7/14/2009).

Department of Toxic Substances Control (DTSC) sites from EnviroStor website (<http://www.envirostor.dtsc.ca.gov>, downloaded on 2/13/2009). Los Angeles Regional Water Quality Control Board (RWQCB) sites from State Water Resources Control Board (SWRCB) GeoTracker website (<http://geotracker.swrcb.ca.gov>, downloaded on 2/13/2009). DTSC and RWQCB site locations were mapped based on latitude/longitude data in the EnviroStor and GeoTracker data sets. For some DTSC and RWQCB sites, it was determined that there were inconsistencies between the latitude/longitude and street address data. For these sites, site locations were adjusted based on the street address. Two RWQCB sites, Caltrans I-5 Freeway Widening Project and Greenway Trail Project, are not shown due to the large area covered by these projects. Unique identifiers (e.g., Map IDs R-1, D-1, etc.) were assigned by SAIC. "RT" is used to represent RWQCB sites. "D" is used to represent DTSC sites. Refer to map indices "DTSC Sites\_Map Index\_8-10-09\_FINAL" or "RWQCB Sites\_Map Index\_8-10-09\_FINAL" for the facility name, address, site type and site status associated with each site. Sites located more than one mile from the composite plume boundary generally are not shown in the main map frame. However, all sites are shown in the map inset. Sites shown outside of the Whittier, Santa Fe Springs and Norwalk city boundaries may indicate data entry errors in the city name listed in EnviroStor or GeoTracker. These sites are located within or near the city boundaries of North Whittier, South Whittier, or Whittier Narrows, suggesting that a portion of the city name may have been omitted.

**Notes**

(a) The list of Department of Toxic Substances Control (DTSC) sites in Whittier, Santa Fe Springs and Norwalk was generated from an advanced search of the DTSC EnviroStor Database (<http://www.envirostor.dtsc.ca.gov>). The search was performed on 2/13/2009. Sites were identified by searching for city name. The following search terms were used: Whittier (and also Wittier, Whittier, Whit and tier), Santa Fe Springs (and also Santa Fe and Spring), and Norwalk (and also Nor and walk). The search was limited to Cleanup Sites only. Permitted Facilities were not included in the search. With the exception of the columns "Map ID" and "Displayed in Main Map Frame", which were added by SAIC, all data are presented as obtained from EnviroStor.

(b) Map ID represents a unique identifier assigned by SAIC. These IDs correspond to labels used in the Composite Plume Footprint Map to identify DTSC Sites.

(c) Refer to the Composite Plume Footprint Map. Sites located more than one mile from the Composite Plume Footprint generally are not shown in the main map frame. However, all sites are shown in the map inset.

(d) For detailed descriptions of the various DTSC Site/Facility Types, refer to pages 6-8 of the *Department of Toxic Substances Control EnviroStor Data Glossary* (available online at <http://www.envirostor.dtsc.ca.gov/public/EnviroStor%20Glossary.pdf>)

(e) For detailed descriptions of the various DTSC Site Cleanup Statuses, refer to pages 2-4 of the *Department of Toxic Substances Control EnviroStor Data Glossary* (available online at <http://www.envirostor.dtsc.ca.gov/public/EnviroStor%20Glossary.pdf>)

(f) Based on latitude/longitude and street address data obtained from EnviroStor, map IDs D-9, D-11 and D-12 are located within or near the city boundaries of South Whittier, North Whittier or Whittier Narrows. This may indicate an error in the city name listed in EnviroStor.

# RWQCB Sites in Whittier, Santa Fe Springs, and Norwalk, California

#### Notes

(a) The list of Regional Water Quality Control Board (RWQCB) sites in Whittier, Santa Fe Springs and Norwalk was generated from an advanced search of the State Water Resource Control Board's website (<http://www.envirostor.dtsc.ca.gov>). The search was performed on 2/13/2009. Sites were identified by searching for city name. The following search terms were used: Whittier (and also Wittier, Whitier, Whit and tier), Santa Fe Springs (and also Santa Fe and Spring), and Norwalk (and also Nor and walk). The search was limited to Other Water Board Cleanup Sites, Land Disposal Sites and Military Cleanup Sites only. Permitted Facilities and Leaking Underground Storage Tank (LUST) facilities were not included in the search. With the exception of the columns "Map ID" and "Displayed in Main Map Frame", which were added by SAIC, all data are presented as obtained from GeoTracker.

(b) Map ID represents a unique identifier assigned by SAIC. These IDs correspond to labels used in the Composite Plume Footprint Map to identify RWQCB Sites.

(c) Refer to the Composite Plume Footprint Map. Sites located more than one mile from the Composite Plume Footprint generally are not shown in the main map frame. However, all sites are shown in the map inset.

(d) Site/Facility Type corresponds to one of three SWRCB programs:

**Cleanup Program:** Formerly known as the Spills, Leak, Investigation, and Cleanup (SLIC) Program, according to the SWRCB website, "the Site Cleanup Program (SCP) deals with site investigation and corrective action involving sites not overseen by the Underground Tank Program and the Well Investigation Program. This program is not restricted to particular pollutants or environments; rather, the program covers all types of pollutants (such as solvents, petroleum fuels, and heavy metals) and all environments (including surface and water, groundwater, and the vadose zone). Upon confirming that an unauthorized discharge is polluting or threatens to pollute regional waterbodies, the Regional Board oversees site investigation and corrective action." For more information, refer to the SWRCB RWQCB Region 4 website ([http://www.swrcb.ca.gov/rwqcb4/water\\_issues/programs/remediation](http://www.swrcb.ca.gov/rwqcb4/water_issues/programs/remediation)).

**Land Disposal Program:** According to the SWRCB website, "the Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills. California Code of Regulations (CCR) Title 23, (Chapter 15) contains the regulatory requirements for hazardous waste. CCR Title 27, contains the regulatory requirements for wastes other hazardous waste." For more information, refer to the SWRCB website ([http://www.waterboards.ca.gov/water\\_issues/programs/land\\_disposal/index.shtml](http://www.waterboards.ca.gov/water_issues/programs/land_disposal/index.shtml)).

**Military Cleanup:** According to the SWRCB website, "the [SWRCB] and nine [RWQCBs] partner with the Department of Defense (DoD) through the Defense and State Memorandum of Agreement (DSMOA) to oversee the investigation and remediation of water quality issues at military facilities. The over 200 military facilities listed on Attachment A of the DSMOA, require environmental cleanups that range from a few UST cleanups to complex Superfund cleanups." For more information, refer to the SWRCB website ([http://www.waterboards.ca.gov/water\\_issues/programs/dept\\_of\\_defense/index.shtml](http://www.waterboards.ca.gov/water_issues/programs/dept_of_defense/index.shtml)).

(e) Site Status is characterized as Open, Closed, or Referred.

(f) Based on latitude/longitude and street address data obtained from GeoTracker, map IDs R-1, R-2, R-5, R-14, R-15, R-18 and R-19 are located within or near the city boundaries of South Whittier, North Whittier and Whittier Narrows. This may indicate an error in the city name listed in GeoTracker.
